

A Suit That Fits Measurement Guide

This is a guide with simple instructions on how to take the 16 measurements that we need to make your A Suit That Fits. Here is some help to get you started:

Do I have time?

- Following our guide, it will take a matter of around 15 - 20 minutes to take all your measurements.
- Write them on the sheets in the spaces provided, then enter them online in *The Fitting Room*, under *Measure Yourself*
- Once completed, your profile will be saved in the *My Orders & Profiles* area at the top right of the screen when you are logged in. You can then combine this profile with your order.

What do I need?

- A fabric measuring tape (we take all our measurements in inches).
- Assistance from a friend (the measurer)
- A well fitting shirt, pair of trousers (not jeans), jacket, and a pair of shoes.

What do I need to remember when taking measurements?

- Keep the measuring tape comfortably snug, but not tight. Our tailors will make the clothes so that they fit to your body.
- All measurements should be made to nearest 0.25 inch.

How can I get more help?

Simple, either look at our online FAQs for instant help or get in contact

Either by calling 0207 168 8215, or emailing us at onlinesupport@asuitthatfits.com

Our team will be happy to help.

1. Neck

What to Wear: Shirt

Measure around your neck at the level your shirt collar would sit. You should not feel restricted by the tape for a comfortable fit, and should be able to put your index finger inside the tape.

Measurement: _____ . _____ inches

2. Chest

What to Wear: Shirt

Measure horizontally around the chest roughly at nipple level, under the armpits, and over your shoulder blades. You should only just be able to feel the tape on your chest. Do not over-inflate your chest but stand normally; you should be able to fit your index finger in between the tape and your chest.

This measurement is a body measurement and there will be an allowance added to it to make your jacket, the allowance will be added according to the fit that you chose.

Measurement: _____ . _____ inches

3: Jacket Waist

What to Wear: Shirt

Measure horizontally around your stomach at the level of the bottom of the ribcage. As a guide this measurement should be where you are widest. Allow some room for breathing/movement.

Measurement: _____ . _____ inches

4. Shoulder Width

What to Wear: Jacket

Measure from the end of your left shoulder to the end of your right shoulder. This measurement should be equal to the desired width of the jacket's shoulders.

Measurement: _____ . _____ inches

5. Jacket Length

What to Wear: A Jacket

Measure vertically down your front from just next to the collar on your jacket, where the seam is on your shoulder, to where you would like the jacket to end.

If you are unsure of the perfect length it is generally accepted to be where your knuckles are with your arms naturally hanging down. A shorter, more trendy length, looks good when coupled with jeans, but is an acquired taste in a suit.

You can also use a jacket you like as a guide.

Measurement: _____ . _____ inches

6. Left Sleeve

What to Wear: Jacket

Measure from where the seams on the shoulder meet to where you want the sleeve to end. The measurement you input will be the measurement of your jacket sleeve. We recommend that the sleeve should go to the base of your thumb (located at the wrist joint).

Measurement: _____ . _____ inches

7. Right Sleeve

What to Wear: Jacket

Measure from where the seams on the shoulder meet to where you want the sleeve to end. The measurement you input will be the measurement of your jacket sleeve. We recommend that the sleeve should go to the base of your thumb (located at the wrist joint).

Measurement: _____ . _____ inches

Well done! That's the jacket finished, now onto the trousers.

8. Trouser Waist

What to Wear: Shirt/Trousers

Measure horizontally around your waist, just inside where you like to wear the top of your trousers. Make sure the tape is snug and does not ride over the waistband but you should be able to put your index finger inside the tape.

As a guide, this measurement will be about 2 inches above what you take off-the-peg...they like to flatter, and unfortunately we need real measurements.

Measurement: _____ . _____ inches

9. Seat

What to Wear: Trousers

Measure around your hips and buttocks at their widest point on a pair of well-fitting trousers (not jeans). Make sure your pockets are empty and the tape is not restrictive.

As a guide, you should not make the tape too snug. You only just be able to feel the tape when measuring.

Measurement: _____ . _____ inches

10: Inside Leg

What to Wear: Trousers/Shoes

Measure from the lowest part of the crotch of your trousers (not jeans), keeping the measure taut, down to where you wish the bottom of the trousers to end. Please bear in mind the fit you want over the shoe as this will affect the height of the trouser crotch.

Please also stand up straight, do not be tempted to look down as this will affect the measurement, use a mirror to look instead.

Measurement: _____ . _____ inches

11: Outside Leg

What to Wear: Trousers/Shoes

Measure from the top of the waistband on a pair of trousers (not jeans), keeping the measure taut, down to where you wish the bottom of the trousers to end. Please bear in mind the fit you want over the shoe as this will affect the length of the trousers.

Please also stand up straight, do not be tempted to look down as this will affect the measurement, use a mirror to look instead.

Measurement: _____ . _____ inches

12: Crotch

What to Wear: Trousers

Measure from the top of the trouser waistband at the front, between your legs, to top of the waistband at the back. Allow as much space as needed for comfort.

Measurement: _____ . _____ inches

13: Thigh

What to Wear: Trousers

Empty your pockets, then measure around the thigh of your trousers (no jeans) at the widest point (usually as high as you can go without it getting embarrassing), you should be able to fit your index finger in behind the tape measure.

This is a skin measurement and should be taken just below the crotch.

Measurement: _____ . _____ inches

14: Knee

What to Wear: Trousers

Keep your leg straight and measure comfortably around your knee at the widest point. This is a skin measurement.

Measurement: _____ . _____ inches

15: Ankle

What to Wear: Trousers/Shirt

Trouser bottoms should ideally harmonize with the shoes, covering between 1/2 and 2/3 of their surface. Narrow ankles will make the shoe look large, the trousers sit higher (and therefore need to be shorter), and vice versa. One tip is to measure the ankle width of some trousers you like the cut of. To do this simply lie them flat, measure one side and then double the measurement.

As a guide 14-17 inches can be construed as slim or tapered (be careful you can get your foot through though!), 17-19 as standard, and 19+ as bootcut going to flared.

Measurement: _____ . _____ inches

16: Waistcoat

What to Wear: Shirt

Measure from the bottom of your shirt collar to below your belt line. Even if you don't wish to have a waistcoat - please give the measurement a go...it helps us to make your jacket pattern too.

Measurement: _____ . _____ inches

Finished! All you need to do now is to send your measurements to us via our website, www.aSuitThatFits.com. It is really easy to do, with step-by-step instructions.

*Have a cup of tea, and log in to our website, then go to the **measure yourself** section of the **Fitting Room** and follow the instructions. The webpage will look similar to this guide.*

Thank you, we are looking forward to making your suit.
